Meeting Topic: *High Meadow Water Storage Capabilities*

Presented by: Jeff Dunn, WGM Group

Background: With support from a DNRC planning grant, BHWC has partnered with Deer Lodge Valley Conservation District (DLVCD) and WGM Group to assess the potential for storing water in high alpine meadows. This work involves mapping and prioritizing locations where meadow-based water storage could realistically and effectively be implemented. These natural systems act like sponges—holding snowmelt and precipitation longer into the season, helping to maintain streamflows when water is most needed.

Jeff will provide a more thorough explanation of the project and an update on how it's going so far.
